

Little Filler

Big Heart

Our experience for many decades of liquid filling has resulted in our customers telling us...

"AESUS has the best little Filler in the business".

From ml to gallons
on the same machine.
Immediately ready
to fill again.
Limitless fill dispensing
Repeatabilities of +/- 0.5%
Fast changeover
Compact

The heart of the filler is the Pump

The unique Patented AES Pump* precision sanitary pharmaceutical grade pump can be totally disassembled without tools for cleaning and sterilization. The machine can draw product from above or below or to the side by rotating the AES Pump* on its docking plate, an exclusive Aesus feature.

We offer various different product feed tanks according to your needs or budget. From plastic to stainless steel tanks and pressurized vessels among others.

Some products need warming, and heated jackets can be provided to keep the pumps warm, heated hoses can be provided, and heated jackets can be provided for the Hopper.

AESFill AF1 fillers can be networked together to make a multi-headed liquid filling system. Just plug each unit into power and connect all units together with readily available 'Ethernet' style cables and they are networked.

Our Turntables Conveyors Modular and can be standard or raised bed sanitary, or even our Premier conveyor with curved tops for ultimate ease in cleaning. Turntables or packing tables in various sizes are available to suit your requirements.

Other options that can be added include, partial nozzle dive, full nozzle dive, neck centering profile filling and others.

*Aesus AesPump Sanitary pump is Patented under US Patent 7309218
